Reign of Dragons, a hit card battle game from Japan,
goes live in the United States on GREE

<https://itunes.apple.com/app/id531095755>

Drecom Corporation Limited, a Japanese social gaming company based in Tokyo, brings Reign of Dragons to the US today. Reign of Dragons is based off of the highly successful massively multiplayer online card battle game Dragon Dreizehn, which is the Japanese version of the game offered on the social networking services GREE and mixi. Since September of this year the game has been in beta testing in several countries.

As a warrior descendant of the Dragon Clan, the player must rally together a strong gathering of Dragons and other creatures to save the world from the ever growing evil and prevent its destruction by their hands. The ultimate goal of the player is to become the Dragon King himself/herself. Players will encounter terrifying dragons, mystifyingly beautiful women, curious fairy queens, fear-inspiring demons, and much more! All users regardless of age or gender will be able to enjoy and appreciate the beautifully, and painstakingly hand-crafted illustrations created by over 50 professional artists.

Reign of Dragons utilizes a variety of great sound effects and enchanting background music that enliven the experience. While embarking on the many, unique quests, the game gives players the ability to perform stunning attacks with dazzling animations and graphics at surprising speeds for a mobile application. While still retaining the essence of the gorgeous Japanese cards, the U.S. version of Reign of Dragons will have all new illustrations created especially for an American and worldwide audience. The focus of Reign of Dragons is its impelling storyline, beautiful illustrations, and ease of gameplay. It is well received in Japan and consequently will be made available for the enjoyment of users worldwide.

To get a better feel of the world of Dragon Dreizehn, check out the trailer at the link below:

■About the original Dragon Dreizehn

Dragon Dreizehn is a Fantasy Card Battle Game with a dragon motif. The game is somewhat of a real-time-strategy type in that 13 days in real life equates to the repeating 13 day loop in game. Some events and enemies will only appear on certain days of the 13 day cycle. Each 13 day loop is never the same as the last! Users can take part in new quests and stories every 2 weeks! The game was well received in Japan and earned over 100,000 downloads in just the first week!

■About Drecom Corporation Limited

Drecom is a team of innovators rallied together under the banner of “communication”. We specialize in the planning and developing of mobile content and online advertising as well as various other services. Though our products are mainly available on the internet, we view ourselves as a “manufacturing company”. We dedicate a large portion of our efforts to our 3 main business focuses: social games, Ad-solutions, and Social Learning services. It is Drecom’s vision to improve our customers’ online experiences and make them more enjoyable by “socializing” online content and allowing our users to easily share with friends the things they enjoy.
